FREELANCE

Tania's Site | [Website](#) | 2020

Hired to create a web app that helped monetize the client's time and improve customer experience through more efficient access to schedule meetings.

- Delivered high-touch communication and collaboration to inform and advise the client on project requirements and use cases to align with client needs and budget.
- Designed a dual language website (English and Spanish) to reach a greater client base.
- Integrated Acuity to streamline scheduling, accept payments, and automate emails.

PROJECTS

BudgetMe | [Website](#) | 2020

A single page application, SPA, built to help track expenses and set personal financial goals.

- Hosted on Netlify and connected to Github to allow for continuous integration and development, CI/CD.
- Designed to be a full-stack app, but used the Web Storage API to remove the need for database and backend hosting which reduced the total cost to maintain to \$0.
- Increased web page render speed by implementing Lazy-Loading

UGelp | [Website](#) | 2019

A Yelp inspired web application allowing users to easily search and read reviews on local businesses.

- Developed with React, using Yelp's Fusion API and Google Maps API for greater geolocation accuracy and effective user experience.
- Implemented a data store with React's Context API that reduced the time spent learning and removes the need for an external library.

LuxHotel | [Website](#) | 2019

With inspiration taken from Coding Addict's video Beach Resort, wrote code and integrated images and data provided by video.

- Built with React.js, utilizing stateful and stateless components, styled-components, and react hooks.
- Styled using CSS3 and layout was created with grid, flex-box, and media queries to create a responsive design.

WORK EXPERIENCE

Assembler | Essentium, Inc | Pflugerville, TX | 2020 - present

- Working full time while continuing to code and elevate technical abilities

Delivery Driver | Service Staffing & Appleby & Co | Riverside, CA | 2016-2019

Sales Floor/ Cashier | Target - Northridge, CA | 2013-2016

EDUCATION & RELATED COURSES

Udacity

2/2020 - present

- *Intro to Data Structures and Algorithms by Google*

Coding Dojo, Coding Bootcamp | Full-stack Web Development - Courses: Python, MEAN

11/2018 - 04/2019

- Earned Black Belt, Coding Dojo's highest knowledge levels in Python and MEAN stack.
- 1000+ hours of code and web development
